A WORLD LEADER IN FUME EXTRACTION TECHNOLOGY

FumeCAB 700

ELECTRONICS, PHARMACEUTICAL & MEDICAL

Last Updated on 30.08.2018

The complete solution for fume cabinet extraction for a broad range of applications.

Partial enclosures are becoming the recommended extraction option for a variety of applications.

The FumeCAB 700 integrated filtration system has been designed to help towards compliance with the latest regulations. The innovative Cam filter change design enables safe and simple front loading filter replacement and provides many benefits over alternative rear access systems.

Ultra-bright slim line energy saving LED lights come as standard with optional UV lighting, making the FumeCAB 700 an ideal choice for applications such as the conformal coating of PCBs, where operators can now easily identify uniformity issues with the coating.

Key features of the FumeCAB 700

Technology

Certified to BS 7989:2001 - Recirculatory filtration fume cabinet specification Standard

Auto Sensing Flow Control Standard

Twin coated anti UV / anti splash protective Polycarbonate visor

Standard

Large working area Standard

Audible and visual warning alarms Standard

VOC monitor Optional Ensures operational compliance with HSG258 guidelines Standard

Energy saving ultra-bright slim line LED lighting Standard

Low noise level Standard

Side entry blind grommets for equipment access Standard

UV lighting Optional

Stand Optional
