

Description

CleanPro® bouffant hoods, also referred to as ninja hoods, do a better job of preventing loose hair from contaminating product than hair nets or bouffant caps. Bouffant hoods provide the benefits of both bouffant caps and beard covers in a single SKU, as the design encompasses all hair, including facial hair.

Due to their extra length, these hood will fully cover all hair, including facial and neck hair. They can be tucked into an outer garment for added protection against contamination.

CleanPro® bouffant hoods are individually inspected for stitching, sizing, material, and workmanship to ensure high-quality. They are reliable protection for laboratory, pharmaceutical, food, industrial, and cleanroom applications. They can also be worn above the mouth and nose to act as a partial face shield, while still allowing one to breathe.

Product Features

- Low linting, non-woven 100% spun bound polypropylene
- Latex-free elastics, chemically unreactive and biologically inert
- Color: White with white stitching (other colors available)
