

Fiber Optic Swab

2316-2317

Precisely designed, manufactured and packaged to serve a wide variety of cleaning and maintenance needs. TechSwabs are manufactured in accordance with Techspray's rigid specifications, using specialized materials to ensure low particle generation. Cotton swabs are the most economical choice for high volume usage. Foam swabs are ideal for more precision cleaning where linting needs to be avoided.

High-precision foam swab for fiber optic connectors

Foam fiber optic swabs are ideal for removing transmission disrupting contaminants in bulkhead connectors. The head conforms to the various connector shapes, cleaning the conductor bulkhead corners inside the bulkhead pocket. Foam fiber optic swabs are an economic choice over wrapped swabs. Tips are heat bonded, so no contaminating glues have been used.

- Reticulated polyurethane foam
- Head thermally bonded
- High absorbency
- Low particulate count
- Flexible tip for softer touch
- Designed to fit standard fiber optic apertures

Product Packaging
